Skills Highway Literacy/Numeracy workshop

Marion Drew 16th March 2017

Financial Literacy in the workplace

Money

The universal language we all need to master in order to
survive in today's world

Challenges/Barriers for Financial Education

- Negative perceptions from previous learning
- Low literacy and numeracy skills
- It's extra work on top of the work load they already have
- Are not used to talking about money openly
- If they've been told they're useless, they'll believe it
- I won't be able to do that, so it's not worth trying
- I have enough to do already
- It's no one else's business

Overcoming the Barriers

Relevant

link it to work/everyday life

Scenarios

more comfortable talking about other people's financial problems

Financial Literacy

opportunity to practice the underpinning literacy and numeracy skills when working through tasks

Herman Faleafa wants a loan

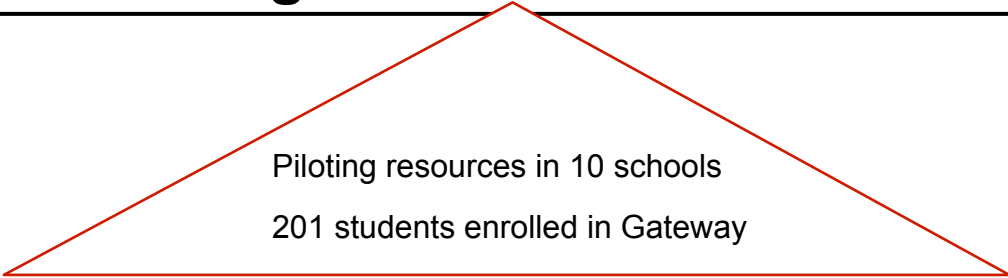

The Commerce Commission

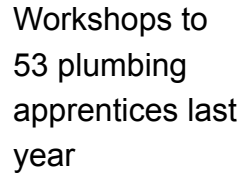

Financial Capability in Trades project

- Financially capable apprentices with robust foundation skills.
- Empowering trainees to make informed decisions for future directions and business opportunities.
- Building competences and skills to complete trades training and carry trainees forward to economic independence.
- Highlighting opportunities to engage in further learning such as a business qualification, followed by a project management qualification will reinforce those skills to build their own future wellbeing.

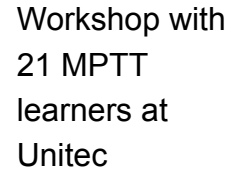

What else are we doing?

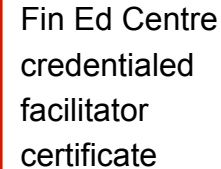

Piloting resources in 10 schools
201 students enrolled in Gateway

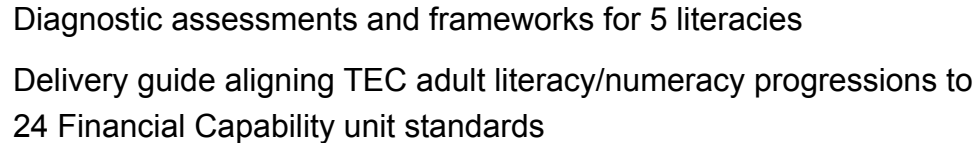

Workshops to
53 plumbing
apprentices last
year

Workshop with
21 MPTT
learners at
Unitec

Fin Ed Centre
credentialed
facilitator
certificate

Diagnostic assessments and frameworks for 5 literacies
Delivery guide aligning TEC adult literacy/numeracy progressions to
24 Financial Capability unit standards

Take your partners please

Many hands make light work,

Many minds make new and unique ideas.

Ideas Only Become Innovations Through Collaboration (Bob Roitblat January 18, 2016)
